

Brain Burner For Lesson 49  
Exodus  
Lesson 10

1. Some scientists argue that the parting of the Red Sea can be explained naturally. “Winds blowing at 20 m/s for 10-14 hours can cause the sea level of the Red Sea to drop 2.5 meters. Such an event may have revealed an underwater ridge over which Israel crossed the Red Sea.” Is this a plausible explanation according to the biblical account? Explain.
