| Old Testament Survey | Lesson 7 |

BRAIN BURNER #7

| 1. | You go off to college and meet a fellow classmate who is a theistic evolutionist. He believes in God and the Bible, but he also believes in evolution. He may actually say that God used evolution to bring about life on this planet as it is today. How would you use science and the Bible, especially the truth about Noah and the flood, to attempt to show this individual the error of his ways? | |
|----|--|--|

| | | |
| | | |
| | | |
| 2. | You attend a youth group meeting and the teacher says the story of Noah's ark is just that, a story. They explain that the flood was not universal, but is a hyperbole just to teach morals as written in the Scriptures. The teacher says we need to be more concerned about practicing and teaching the love of Jesus than arguing about the particulars of the flood. What biblical and scientific truths would you address to show him the inconsistency of his belief system? | |
